

Innovative staking platform

t.me/IOXplatform

What is IOX?

At its core, IOX means greed. It is an incredibly lucrative staking Dapp that is built on the shoulders of giants. Drawing inspiration from the highly successful T2X platform from the glory days of DeFi, IOX brings the auction fun and FOMO to the Binance Smart Chain.

IOX is designed to provide maximum benefit to the stakers. Users will buy IOX tokens with BNB on our easy to use dApp. They can then stake their tokens to earn interest paid in IOX along with their share of the BNB dividends from the daily auction lobby. Users can make as many stakes they want for as long as they want up to a maximum of 300 days. The longer the stake, the more interest you earn, all while enjoying staking bonuses along the way. Simple.

How do you get IOX Tokens?

There are 3 main ways that you can get IOX tokens:

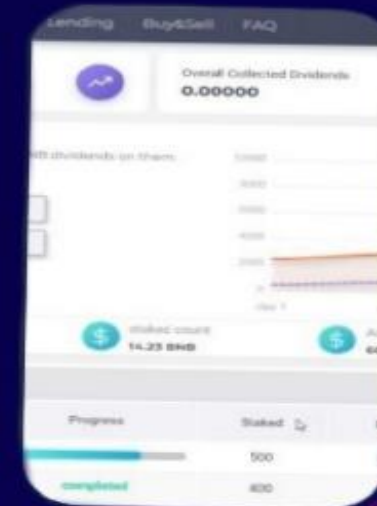

1. Participate in a daily auction and swap your ENE for IOX tokens
2. Refer your friends and earn 5% bonus on all of their auction entries.
3. Stake IOX to earn daily interest on your stake. (See “tokenomics” for a full breakdown)

Staking System

The staking portal lives on our panel where users can stake their IOX Tokens for their desired duration up to 300 days stakes will accrue daily BNB dividends based on the amount of IOX tokens staked. This amount will vary on the amount of BNB in the lobby on each day of the stake, stakes will also receive IOX bonus tokens.

Users will be able to collect their staked tokens and the dividends at the end of their stakes period

Bonus Tokens

Users receive bonus IOX tokens on their active stakes which is highly based on the duration of their stakes. Longer the duration higher the bonus percentage,

The graph shows the growth of the bonus tokens far Stalin, At it's highest (which is 300 days) the percentage goes up to 125k

What is the Dividends pool?

A 94% of all BNB that enters the daily auction lobby is pooled to be distributed back out to the stakers, which we call the dividends pool. At the end of each day the BNB dividend pool will be calculated and allocated to all of the open stakes based on their

staked amount. How is the Dividends pool calculated?

As shown on the next slide, daily dividend payout is split over a period of time. For example, assuming day 3 ended with a 1001 BNB entry, that BNB will be divided by 3 as its day 3, and split out over 3 days in chunks of 33.3 BNB. Another example, day 10 ends with 100 BNB, these BNB are split into chunks of 10 which are sent out over 10 days. As the days go on and the pools grow in size, these dividends will keep going and adding, allowing for much stronger and stable payouts. This caps at day 60. This also ensures that our project can live a longer lifespan and adds to the game theory behind the staking of the tokens themselves.

Average entry of 100 BNB a day

Lobby Entry (BNB)

Contract Day	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
Day's Pool (BNB)	0	100	50	33.33	25.33	20.33	16.66	14.28	12.5	11.11	10	9.09	8.33	7.69	7.14	6.66	6.25	5.88	5.55	5.26

Auctions!

Auction lobbies are the main way users can acquire IOX Each day IOX tokens will be auctioned and users can pledge BNB and collect IOX tokens at the end of the day proportional to their contribution. Where does all the BNB go? 94% of all BNB collected is returned to the stakers. The outer Exis served for development costs and buybacks which will be explained in the nost slide

How many tokens?

On day 1 Lobby there will be 3,000,000 tokens up for grabs At the end of every day the amount of tokens in the auction pool will decrease by 0.5%

The price of the token will depend on how much BNB has been contributed to the lobby on that day. If you watch closely you will be able to spot light days and take advantage by increasing your share of that day's pool

Buybacks!

The 5% that the team collects will be used to facilitate marketing, team costs but more importantly buybacks. The buybacks will be used to foster and cultivate continual growth of the platform over the long term Using the teams discretion, then the wall regularly he put back into the system to and to the cindende poot These tokens will also be burned to add an extra layer of benefit to the community/

Selling & Buying stakes

There is no direct feature in contract to sell IOX Tokens, however there a feature for user to sell their active stakes! In the panel on the “buy & sell section users can put up their stakes for sell or chose to buy other users auctioned

Buying an active stake will move the stake to the buyers account and it will be visible in their panal and collectable (both the stake’s IOX tokans and it’s BNB dividends) after the stake ended.

There is a 10% fee that die stakes seller pays which of that will be buybacked to the contract’s current day lobby

Referral System

IOX has a great referral system that rewards both side!

Everyone wins when using a ref link! There's zero reason NOT to use one!

Your referrals will earn an extra 1% minted IOX tokens on their auction lobby collect. As the referrer you will earn an extra 5% There are no limits on number nor the amount of referrals that you can get.

Can I change my referral link?

Yes your referral address saves on your browser's cookies, you can always remove or change your referral by clicking on a new referral link or removing cookies

What is my referral link?

You can find your referral link in the IOX panel. <https://ioxplatform.net/stake>

Thank you
